# Work-Out Wipes™

***Throw away your spray bottles and dirty towels!!***

Do you, your players or clients leave your work out feeling their best or are they leaving with someone else's germs. The cardio and weight rooms are prime breeding grounds for coughs, colds, ringworm and other infections. The warm and sweaty atmosphere makes it easy for viruses to spread. As machines, seats and benches are shared, viruses are transmitted to equipment that hasn't been cleaned properly. Rhinovirus, the leading cause of the common cold and respiratory infections are spread most commonly by cross contamination. A person can become infected if they touch a piece of contaminated equipment then wipe their nose or face. To help avoid catching and spreading germs, wipe off the equipment before and after use.

Avoid using spray bottles and damp cloth towels, they increase your risk of infection by cross contamination. Spray bottle handles can also be infected. The damp cloth towels increase your risk of infection. Spray bottle mist the air with chemicals that you inhale, and over spraying could effect the electronics and LED panels on the exercise equipment. Athletes from all sports love the fact that the days of using towel and spray bottle to clean their training equipment are history.

Work-out Wipes are convenient, hygienic low cost substitute for towels and spray bottles. Work-out Wipes are top quality cloth like sheets that are pretreated with the proprietary blend of anti-bacterial, sanitizer and odor counteractive that make Work-out Wipes very effective. The Work-out Wipe units are a touch-free, center pull, pre-treated towel dispenser. They are used in gyms and work out centers at colleges, universities, hotels, corporations and rehabilitation centers across the country. Call for more information or visit our web site!
